## **About**

I am a self-motivated and goal-oriented professional with a strong work ethic focused on designing impactful websites and mobile apps. Committed to continuous learning and collaboration, aiming to become a valuable asset in the industry.

## Education

Institute of Technology University of Moratuwa, National Diploma in Technology

2021 - 2024

# **Experience**

Associate Software Engineer, Fida Global PVT LTD

Aug 2024 - Present

Intern Software Engineer, Fida Global PVT LTD

Feb 2024 - Aug 2024

# **Projects**

## **Smart Energy Meter Application**

- Developed an application to efficiently track kWh, cost, voltage, and more with real-time data and interactive visuals for smarter energy management.
- Tools used: ReactJS, Node, IoT, MySQL.

#### **My Contributions**

- Implemented RESTful API integration for real-time data fetching and state management.
- Designed and implemented responsive user interfaces for the real-time energy monitoring dashboard.
- Designed modular and reusable front-end components following best-practices.
- User-friendly forms and controls built for energy management settings.

## **Project Management System**

- Developed an application to manage projects and subtasks with multiple assignees, enabling easy tracking and monitoring of project progress and task completion.
- Tools used: ReactJS, MySQL, Figma, SQL Server Management Studio

#### **My Contributions**

- Designed and implemented intuitive user interfaces for project and task management using Figma and ReactJS
- Created responsive dashboard layouts for project overview, task tracking, and team management
- Developed stored procedures in SQL Server for efficient data handling and queries
- Implemented API integration between frontend and backend systems for seamless data flow
- Built dynamic data visualization components for project progress monitoring

# **SMART HRIS Project**

- Contributed to the maintenance, redesign, and development of the company website to enhance functionality and user experience. Visit: https://demomodern.smarthris.live/LoginHRNEW.aspx
- Tools used: HTML, CSS, ASP.NET, Figma, C#

## My Contributions

- Led the UI redesign initiative for an existing HR management system using Figma and ASP.NET
- Modernized legacy interfaces to improve user experience and system functionality
- Developed new features to enhance the HR management capabilities of the system

## **Company Website Maintenace**

- Redesigned and improved the existing project interface, implementing new features to improve functionality and user experience. Visit: https://www.fidaglobal.com
- Tools used: HTML, CSS, JavaScript, Hostinger, Photoshop

# **My Contributions**

- Spearheaded complete redesign of company website to enhance brand presence and user engagement
- Implemented responsive design principles ensuring optimal viewing across all devices
- Optimized website performance through efficient code structuring and asset optimization
- Managed website hosting and deployment using Hostinger platform
- Developed graphics and visual elements using Photoshop for improved user interface

# System for increase Bank security and efficiency

- Designed and developed a mobile app for real-time monitoring of ATM security and cash levels.
- Tools used: Machine learning, IoT, Flutter, Firebase

## **My Contributions**

- Designed and developed intuitive mobile user interfaces for ATM security monitoring
- Implemented secure user authentication system using Firebase Authentication
- Created real-time dashboard for monitoring ATM cash levels and security status
- Built responsive UI components using Flutter for cross-platform compatibility

# **Technologies**

Languages: HTML & CSS, Dart, JavaScript, Java, C, Shopify, WordPress

Databases: SQL Server, MongoDB, MySQL, Firebase

Frontend Frameworks/Libraries: React, Flutter, React Native, Bootstrap, jQuery, Tailwind CSS

Backend Frameworks: Node.js, WPF, Firebase
